

# MOUNTING INSTRUCTION

## Cutted Letters /Streamers Mounting

1

It's very important that you clean your window with isopropyl alcohol before mounting. When mounted on cars we recommend Surface Cleaner

2

Mark the window or surface for the application and remove the marking flap on the backside of the decoration

3

Place the decoration on the window or surface

4

By cutted letters, slice or cut between each letter

5

Remove half of the protective film and use the scraper to start mounting, take one small step at a time. Small bubbles can be removed by using the scraper towards the edge of the letter

6

Remove the protective film down and scrape to the decoration sticks

7

Remove the film from the front of the letters/streamer. Be careful and check all letters is staying on the window/ surface while you're removing the film

8

If there's any small bubbles left after mounting, you can use a small needle to make a hole in the streamer, and press out any excess air with your scrape
